

Dror Fixler, Ph.D.
Faculty of Engineering
Bar Ilan University

Dror Fixler received his Ph.D. degree in 2003 from the Department of Physics, Bar-Ilan University, Israel. He is a member of the Faculty of Engineering and the Nano center of Bar-Ilan University. He has published over 60 original research papers and holds over 11 issued patents. His research interests include fluorescence measurements (FLIM and anisotropy decay), optical super resolution, high-end electro-optical system engineering and light-tissue interaction. Dr. Fixler received several international awards and organized and presented at over 20 international conferences.
