

Efrat Bodner, Ph.D., Head of Administration at Bar-Ilan Institute of Nano-technology & Advanced Materials (BINA)

Efrat Bodner, trained as an organic chemist received her Ph.D. degree from the Department of Chemistry, Bar-Ilan University. Upon completion in 2008 she took up the position of Projects Manager at BINA, BIU and is currently Head of administration since 2014.

Bar Ilan's Institute for Nanotechnology and Advanced Materials is a dynamic and growing scientific community with a renowned research staff of 57 faculty experts on nano-based approaches to energy, magnetism, optics, clean tech and biomedicine.

Established in 2007 and housed in the Leslie and Susan Gonda (Goldschmied) Nanotechnology Triplex, BINA includes 40 cutting-edge laboratories as well as state-of-the art "Scientific Service" facilities for electron microscopy, nanofabrication, surface analysis, fluorescence, and magnetic measurement, all of which are available for use by the wider scientific community.
