

Marie D'Iorio is the Executive Director of the National Institute for Nanotechnology, Professor of Physics and Assistant VP-Research (Nanotechnology) at the University of Alberta. Dr. D'Iorio obtained a Ph.D. in solid state physics and worked as a post-doctoral fellow at the IBM Zurich Research Laboratory before joining the National Research Council. After eighteen years as a researcher in nano-electronics, Dr. D'Iorio became Director-General of NRC's Institute for Microstructural Sciences. She has led large collaborative programs, in partnership with government departments, industry and academia to accelerate photonics and nanotechnology deployment in various industry sectors. Dr. D'Iorio served as President of the Academy of Science of the Royal Society of Canada. Marie also serves as the Executive Director of NanoCanada.
